Yes, please for brief call at 2.

Not to discuss final funding procedural decisions, but to identify information we need to prepare to support the process.

Thanks,

TIM

Did you want to talk at 2pm today? or postpone until I have more information?

I will be unavailable all week next week. We could schedule something for the week of May 6th. Today at 2pm also works. Let me know.

Thanks

Emmanuelle

Thanks Emmanuelle,

We would not expect EPA and IHS to come up with those answers independently without comprehensive participation of Hopi. HUC is ultimately accountable for the successful delivery of the project so we need to be included in all HAMP decisions about scope, schedule, budget and funding progress.

I am available for a phone call Monday or Tuesday. Tied up with ITCA and BIA Wednesday, Thursday and Friday.

Gratefully,

TIM

Hi Tim,

I'm sorry I've had limited availability to respond to your call yesterday. I am available Friday at 2pm, however I don't believe I will have definitive answers for you. I am hoping we can work through some of the funding questions next week and have a better answer for you then. But I'm happy to chat with you Friday at 2pm.

Thanks,

Emmanuelle

Subject: HAMP Progress

Hi Emmanuelle,

The IHS-Hopi-HUC HAMP agreement is finally making better progress. We would like to understand more about the EPA SDWA TSA allocation process.

Are you available for a call

Friday afternoon at 2:00 or Monday morning at 10?

Proposed Topics:

-Is the decision to include or exclude the EPA SDWA FY 2019, previously expired and future allocations in the IHS HAMP agreement or separately up to IHS or EPA ?

-We understand from you that the Hopi Tribe had EPA grant administration challenges in the past that may impact the Tribes fundability. Would that past transgression of a completely different program, also effect HUC who has it's own highly qualified grant project administration, audits and successful track record of other grant programs?

-Now that HUC has been approved as a Hopi tribal organization for contracting purposes by IHS GC will that help the EPA grant flow through process as in other tribes, ie. NTUA/NECA example.

Thanks-

TIM
